

## MICROSOFT PROJECT 2016 INTERMEDIATE - ONLINE INSTRUCTOR-LED TRAINING

Generate a [group quote](#) today

**COURSE LENGTH: 1.0 DAYS**

To manage projects efficiently using Project 2016, it is essential to build on basic skills already known and learn additional features of the software. Microsoft Project 2016 Intermediate Training Course provides understanding and skill development builds upon basic skills and covers intermediate features of the application, such as customizing the Gantt chart, using network diagrams, creating custom WBS code, updating a project, printing and reporting, sharing resources, and more.

The course is designed for users that have elementary skills in Project 2016. Beginners may consider developing basic skills in the application with Microsoft Project 2016 Introduction Training Course.

We use secure Video Conferencing with interactive features such as live polling, screen sharing, whiteboards, live chat and breakout sessions. Please discuss your preferred platform, most commonly we use Microsoft Teams, Skype for Business, Webex or Zoom upon request.

These courses are facilitated in English, and are open to people from different industries across the USA, Australia, New Zealand, Singapore, Malaysia and Hong Kong - this is a short but powerful learning

experience that gives you global collaboration opportunities. Our trainers and processes have been refined to give you a personalised learning experience.

**\*\*Please note, these classes run to a very tight schedule, please follow the invitation and join the class 10-minutes prior to commencement so you are ready to participate and don't miss a minute!**

## MICROSOFT PROJECT 2016 INTERMEDIATE - ONLINE INSTRUCTOR-LED TRAINING COURSE OUTLINE

---

### FOREWORD

This training course helps participants to build upon basic skills in Microsoft Project 2016. Intermediate and new features of Microsoft Project 2016 will be covered, including understanding project views, managing projects, examining projects, updating projects, printing reports and project views, reporting by report type, updating the resource pool, and comparing project versions.

During the course, participants will learn and practice the use of the various functions of Project 2016 to gain expertise in managing projects skilfully.

Microsoft Project 2016 Intermediate Training Course is the second course in the series of three:

Introduction, Intermediate and Advanced Training Course in Microsoft Project 2016. Each of these courses is targeted to give valuable training to participants with different skill levels in the application.

---

### OUTCOMES

**After completing this course, participants will have learned to:**

- Change time scales
  - Add a custom Gantt Chart
  - Use network diagrams
  - Work with the Network Box (or Node)
  - Modify and format tables
  - Create, display and use custom WBS codes
  - Use team planner
  - Create a budget
  - Use AutoFilters
  - Track and update tasks
  - Understand project costs
  - Work with Project Server and Deliverable Fields
  - View, organise and print reports
  - Change print settings
  - Review and update assignments
  - Compare project versions
  - Perform resource sharing functions
  - Update the Resource Pool
  - Stop resource sharing temporarily and permanently
  - Consolidate projects
- 

### MODULES

### Lesson 1: Managing the project and understanding project views

- Exercises: Preparing a project for analysis and tracking and performing Resource Leveling
- Customising the Gantt Chart bars
- Displaying the Critical Path
- Using the Formatting Tab of the ribbon
- Using Network Diagrams
- Displaying Tables
- Inserting and hiding columns
- Creating a New Table
- Applying Filters
- Using AutoFilters
- Understanding and viewing WBS Codes

### Lesson 3: Printing and Reporting

- Printing project views
- Viewing and changing the print settings
- Add a header, footer, or legend to a view
- Viewing the built in Reports
- Editing Reports
- Visual Reports
- What You Can Print
- Reports by Report Type

### Lesson 2: Examining and Updating the Project

- Amending tasks using various views
- Using Resource Leveling
- Understanding baseline and interim plans
- View project baseline information
- Compare baseline and scheduled information
- Tracking and Updating Tasks Effectively
- Exercise: Updating the Holiday project
- Viewing Progress Lines
- Exercise: Show the Project Progress Line
- Understanding project costs
- Exercise: Adding costs
- Creating a budget
- Viewing total resource costs
- Viewing total task costs
- Reducing project costs
- Understanding Project Deliverables

### Lesson 4: Multiple Projects and Resource Sharing

- The Resource Pool
- Exercise: Create a resource pool from an existing project and share the resources
- Updating the Resource Pool
- Review and update assignments
- Update resource availability or cost information
- Stop sharing resources (temporarily)
- Stop sharing resources from a Resource Pool (permanently)
- Consolidating projects
- When to use a master project and subprojects
- Insert subprojects into a master project
- Compare Project Versions
