AGILE MASTER CERTIFIED TRAINING COURSE OUTLINE

FOREWORD

Rapid changes in technology, market demands, and expectations have paved the way for the conceptualization and implementation of agile methods and values in many organizations. Agile relies on adaptive planning and iterative development and delivery. It focuses primarily on the value of people in getting the job done effectively.

Agile Master Certified (SAMC™) professionals possess a wide ranging knowledge and understanding of the values, methods and intricacies of Agile. The purpose of the exam is to confirm applicants have ability to compare and choose the methodology appropriate in a given situation.

OUTCOMES

In this course you will:

- ▶ Be familiar with the concepts and practices of Agile project delivery.
 - ▶ Be equipped with detailed knowledge and understanding of available Agile methodologies.
 - ▶ Be able to compare and choose the methodologies or parts of methodologies that are most relevant to their current and future situations.
 - ▶ Be armed with the proper tools to take the lead in Agile projects and to address and resolve Agile issues in their organizations.
 - ▶ Become Certified Agile Experts.
-
