EXCEL 2010 INTRODUCTION COURSE OUTLINE

FOREWORD

This Microsoft Excel 2010 Introduction training course can take you from being a complete beginner who has never used Microsoft Excel 2010 all the way through to an informed user who can make full use of the basic functions of Excel.

This Excel 2010 Introduction training course running in Singapore wide, is rated 5.0/5.0 in overall quality by ProCert Labs, teaches the basic functions and features of Excel 2010. After an introduction to spreadsheet terminology and Excel's window components, participants will learn how to use the Help system and navigate worksheets and workbooks. Then they will enter and edit text, values, formulas, and pictures, and they will save workbooks in various formats.

Participants will also move and copy data, learn about absolute and relative references, and work with ranges, rows, and columns. This course also covers simple functions, basic formatting techniques, and printing. Finally, participants will create and modify charts, and learn how to manage large workbooks.

This course will help participants prepare for the Microsoft Office Specialist core-level exam for Excel 2010 (exam 77-882) and the Microsoft Office Specialist Expert exam for Excel 2010 (exam 77-888). For comprehensive certification training, participants should complete the Introduction, Intermediate, and Advanced courses for Excel 2010.
