Management
(KM)**

COURSE LENGTH: 1.0 DAYS

This Knowledge Management (KM) training course teaches you how to implement an efficient method of collecting and using the informational assets and intellectual resources of the employees for the purpose of assisting in organizational success. This Knowledge Management course from PD Training teaches you how to create a system that captures knowledge purposefully for incorporation into business strategies, policies and practices at all levels of the organization.

This course by PD Training helps construct the knowledge base of the organization by improving, systematizing, retaining and making use of the intellectual resources of its employees. Such intellectual resources are acknowledged as an important competitive edge and a driver of effectiveness for every organization.

Learn key skills like gaining the ability to develop a knowledge management model, understand the life cycle of information, learn the rationale behind information management and the implementation and customization of knowledge management systems.

This Knowledge Management (KM) training course can be delivered at your premises anywhere in Singapore by one of our expert local or international trainers.

KNOWLEDGE MANAGEMENT (KM) COURSE OUTLINE

FOREWORD

Today's business culture thrives on knowledge. Possessing knowledge gives your organization a competitive advantage when choosing the right decisions or strategies to implement. The Internet distributes knowledge at split-second rates while laptops, tablets and smart phones bring knowledge to our fingertips in an instant. As the old adage says, "knowledge is power."

Organizations have a wealth of knowledge accessible through the people they touch internally (employees) and externally (customers). Businesses that allow knowledge to go unmanaged may be giving their competitors the upper hand in the market. The company that is able to capture, store, and retrieve knowledge effectively is then capable of learning and evolving as an organization. A learning organization is one where employees are empowered to change and develop new methods, thoughts, and strategies that will advance the mission of their organization.

Knowledge Management is the establishment of a system that captures knowledge purposefully for incorporating it into business strategies, policies, and practices at all levels of the company. This course will teach the participant how to initiate a knowledge management program at work. When it comes to knowledge management, any organization is able to implement a strategy. Wherever there are humans working together for one goal, there is knowledge to be harvested, stored, and dispensed as needed.

OUTCOMES
