MEASURING RESULTS FROM TRAINING COURSE OUTLINE

FOREWORD

Training is a very important part of your professional development; however, sometimes, it is hard for management to measure how effective the training actually was. A time management course teaches specific skills to implement to save time, but how does your manager know if you've implemented these skills on a daily basis and if you are actually managing your time better?

Although we all know that training can have many amazing benefits, sometimes it can be hard to prove those benefits and attach a dollar value to training. Some topics, like sales training or time management, might have direct, tangible benefits. Other topics, like communication or leadership, might have benefits that you can't put a dollar value on.

In this course, we will learn about the different ways to evaluate training progress, and how to use those results to demonstrate the results that training brings.

OUTCOMES

- Understand Kolb's learning styles & learning cycle
 - Learn about Kirkpatrick's levels of evaluation
 - Become familiar with the many types of evaluation tools including, goal setting, tests, reactionary sheets & interviews
