MICROSOFT EXCEL 2013 EXPERT TRAINING COURSE OUTLINE

FOREWORD

During this training course, participants will learn how to use various functions of Microsoft Excel 2013, including understanding permissions, creating and running a macro, analyzing data using multiple tables, using trend lines, creating a form using various controls, performing advanced formula auditing and calculations, and working with slicers.

To facilitate easy learning and the retention of knowledge, the training course includes a step-by-step explanation of procedures, the use of each feature, snapshots, and review questions.

OUTCOMES

After completing this course, participants will have learned to:

- Encrypt a password
- Set Excel options
- Inspect documents
- Edit shared workbooks
- Set calculation options
- Evaluate formulas
- Create one-dimensional and two-dimensional constants
- Create advanced Arrays
- Assign, run, configure and change macros
- Work with forms
- Use data form, list box control, spin button control and scroll bar control
- Use secondary axes
- Add trend lines
- Use chart templates
- Create and format Slicers
- Work with PivotTables
- Create a Power View sheet
- Add tables and maps to a Power View report

MODULES

Lesson 1: Getting Started

- Housekeeping Items
- Workshop Objectives
- The Parking Lot
- Action Plan

Lesson 2: Working with Permissions and Options

- Marking a Workbook as Final
- Encrypting with a Password and Restricting Permissions
- Protecting the Current Sheet or the Workbook Structure
- Adding a Digital Signature
- Setting Excel Options
- Managing Versions
- Saving a Workbook as an Excel Template
- Lesson Two: Review Questions

Lesson 3: Sharing Workbooks

- Inspecting a Document
- Sharing a Workbook
- Editing a Shared Workbook
- Tracking Changes
- Merging Copies of a Shared Workbook
- Lesson Three: Review Questions

Lesson 4: Performing Advanced Formula and Function Tasks

- Using the Watch Window
- About the Excel Calculation Process
- Setting Calculation Options
- Enabling or Disabling Automatic Workbook Calculations
- Using the IFERROR Function to Evaluate Formulas
- Lesson Four: Review Questions

Lesson 5: Working with Array Formulas

- About Array Formulas
- Creating One-Dimensional and Two-Dimensional Constants
- Creating a Simple Array
- Creating an Advanced Array
- Lesson Five: Review Questions

Lesson 6: Working with Macros

- Assigning a Macro to a Command Button
- Running a Macro by Clicking an Area of a Graphic Object
- Configuring a Macro to Run Automatically Upon Opening the Workbook
- Changing a Macro
- Lesson Six: Review Questions

Lesson 7: Working with Forms

- About Excel Forms, Form Controls, and Active X Controls
- Using a Data Form
- Using a List Box Control
- Using a Combo Box Control
- Using a Spin Button Control
- Using a Scroll Bar control
- Lesson Seven: Review Questions

Lesson 8: Applying Advanced Chart Features

- About Trend Lines
- Add a Trend Line
- Using Secondary Axes
- Using Chart Templates
- Lesson Eight: Review Questions

Lesson 9: Working with PivotTables and Pivot Charts

- Working with PivotTable Tools
- Working with PivotChart Tools
- About Slicers
- Creating a Slicer in an Existing PivotTable
- Creating a Standalone Slicer
- Formatting a Slicer
- Sharing Slicers with Another PivotTable
- Disconnect or Delete a Slicer
- Lesson Nine: Review Questions

Lesson 10: Working with Power View

- About Power View
- Creating a Power View Sheet
- Connecting to Different Data Modules in One Workbook
- Modifying the Data Model without Leaving the Power View Sheet
- Using Drill Down, Drill Up, and Cross Drill
- Lesson Ten: Review Questions

Lesson 11: Working with Multiple Tables in Data Analysis

- Using Multiple Tables in Your Data Analysis
- Connection to Additional Data Sources
- Creating Relationships between Tables
- Using a Timeline to Show Data for Different Time Periods
- Lesson Eleven: Review Questions

Lesson 12: Wrapping Up

- Words from the Wise
- Review of Parking Lot
- Lessons Learned
- Completion of Action Plans and Evaluations
