### FOREWORD

Being a good supervisor in Singapore is determined by how well your employees perform their duties and responsibilities. Your job scope involves setting clear goals and expectations, coaching and motivating your team, ensuring that your employees' work gets done correctly and in a timely manner, resolving conflicts, controlling costs, making sure that the group is working as a team and satisfying upper management. In order to meet those expectations and perform your supervisory work effectively, you can enhance your skills by enrolling in a Supervision training course. So, get your skills up-to-date now!

All too often great team members are promoted to a supervisory role without consideration that supervising is a completely different skill set to that which made them stand out as part of the team. One of the hardest moves to accomplish is the transition from being a team member to that of a team leader or supervisor. Someone in a supervisory role is no longer on equal terms with their peers and has to earn their respect, show authority and leadership and often have to make unpopular decisions.

This **Supervising Others Training Program** will help supervisors become more efficient and proficient at delegating, managing time, setting goals and expectations (for themselves and others), providing feedback, and resolving conflict. People in supervisory roles will improve their skills, confidence and general management abilities. This supervision training will benefit new supervisors and anyone who wants to improve their skills in supervising others; ensuring productivity and team cohesion.

This **supervision course in Singapore** covers the important requirements of being a supervisor. Through exercises, case studies, practical examples and clear guidelines, you will develop the necessary skills and knowledge to achieve results through the effective supervision of your staff.
