HIGHLY EFFECTIVE MANAGEMENT COURSE OUTLINE

FOREWORD

What defines an “effective” manager? Skills like goal setting, time management and financial reporting are obvious, but they are not the only skills required by an effective management team. Staff retention, rates of employee turnover and employee satisfaction are qualities that point to an effective level of management.

Traditionally, middle managers make up the largest managerial layer in an organization. Middle managers are responsible to those above them and those below them. They head a variety of departments and projects. In order for a company to operate smoothly, it is essential that those in management be committed to the goals of the organization and understand how to effectively execute these goals. All managers need a framework in which to operate. Managers need to know the most effective techniques for guiding teams, mentoring individuals, and validating the results. Without solid methods, managers will revert back to using a one-size-fits-all approach to management that may impact on employee morale, productivity and retention.

This Highly Effective Management Training Course will focus on management challenges and offer managers opportunities to develop key skills that can be put into practice on a daily basis.
